DIRECTOR OF CENTRAL INTELLIGENCE
Intelligence Information Handling Committee
WASHINGTON, DC 20505

10 June 1985

MEMORANDUM FOR: Deputy Director of Central Intelligence

VIA: Deputy Director, Intelligence Community Staff

FROM: 25X1
Chairman, Information Handling Committee

SUBJECT: IHC Monthly Report for May 1985 25X1

Computer Security Labeling

On 30 May 1985, the Chairman, IHC, hosted an informal meeting with the Director, Computer Security Center (CSC), the Director/COMPUSEC Project, and CIA's ISSG to discuss a joint computer security labeling program. The program would coordinate the independent activities among the several organizations involved with security labeling. Informally, it was agreed that the labeling problem had to be bounded and that a coordinated outline of the objectives and limitations of a joint program should be prepared soonest for consideration by the DCI and NTISSC. 25X1

Community Information Retrieval System (CIRS) Review

25X1

The CIRS review will focus on the following specific options:

Are the Community intelligence support requirements upon which CIRS is based still valid? 25X1

Are the technical assumptions and planned interagency division of responsibility predicated for CIRS in 1982 still valid?

If the basic CIRS program remains valid and viable, what adjustments need to be made to accommodate current realities?

8 May 1985

MEMORANDUM FOR: Deputy Director of Central Intelligence

VIA: Deputy Director, Intelligence Community Staff

FROM: [redacted]
Chairman, Information Handling Committee

25X1

SUBJECT: IHC Monthly Report for April 1985

Annual IHC Conference

The IHC held its annual off-site conference at [redacted] on 1-3 April; the theme was "Preparing for the Information Explosion." The following decision/action items resulted:

25X1

1. The requirement for security labeling of information in automated data bases will be a major Community issue, and needs to be addressed by IHC early on.
2. The Community Information Retrieval System (CIRS) program must be given a comprehensive management review to determine whether program changes are needed.
3. Agency requirements for access to commercial data bases should be surveyed to determine whether development of a Community common user facility would yield increased economy and efficiency.
4. The Technology Subcommittee should focus its efforts on specific Community problems, in particular, methods for dealing efficiently with large volumes of open source data.
5. The Technical Information Handling Subcommittee should be dissolved.
6. IHC will sponsor an investigation of the usefulness of associative (full text) processing techniques in efficiently handling high volumes of minimally structured data economically. [redacted]
